

BURY CC9060 SOFTWARE UPDATE PROCEDURE

REQUIREMENTS:

BURY CC9060 Bluetooth Handsfree Car Kit.

Bluetooth enabled computer.

Lap Tops are ideal as a Bluetooth connection with the CC9060 is required.
Recommended Bluetooth Dongles are listed at the end of this procedure.

Internet access.

Visit <http://www.celltechsolutions.net/comfort-compact-9060-p-1830.html> to download the *Bury Update Manager*.

Run the Bury Update Manager and follow the defaults to DOWNLOAD the latest CC9060 software version.
This may take several minutes and needs to be done ONCE per new version release.

PREPARATION FOR UPDATE:

Ensure you have the latest Software version downloaded from the internet via the *Bury Update Manager*.
Ensure your CC9060 is within Bluetooth range of your computer.

PREPARE YOUR BLUETOOTH COMPUTER SOFTWARE.

Start/Run your computers Bluetooth software program.
Remove all previously paired devices.
Do NOT start the search at this stage.

PREPARE YOUR *BURY UPDATE MANAGER*.

Start/Run the *Bury Update Manager*, click *next*.
Click *Browse*, click the file named "*repository*" and click *open*.
The repository file starts with a lower case "*r*".
Click *open* and then click *next*.

DO NOT PROCEED ANY FURTHER WITH THE *BURY UPDATE MANAGER*.

The Bury Update Manager should indicate that you are at step **1. START**

PREPARE YOUR CC9060

Ensure that NO mobile phone is connected to the CC9060.
Ensure that Auto-Connect is set to OFF.
From the Head Menu of the CC9060 select *Settings/Device/System*.

BEGIN THE UPDATE IN THE FOLLOWING ORDER:

ON THE CC9060 SELECT SOFTWARE UPDATE AND YES.

The screen will display a progress bar showing "Initialising" or something similar.

ON YOUR COMPUTER SEARCH FOR BLUETOOTH DEVICES.

Your Bluetooth software should find the CC9060 and display it as a modem.
Follow your default options to complete the pairing process.
The passkey is 1234

Once paired make a note of your **outgoing COM Port**. This may vary from time to time and computer to computer.

ON YOUR BURY UPDATE MANAGER :

1. **START.** – Set the COM port and click *next*.
2. **CONNECTING** – If you selected the correct COM port this step will be bypassed.
3. **RECOGNISING DEVICE** – Click *next*.
4. **UNPACKING** – Keep an eye on the next button.
5. **TRANSFERRING** – You must click on *next*.

Once you begin the transfer the CC9060 display will change and the progress bar will indicate *downloading*.

IF YOU WAIT TOO LONG FOR ANY OF THE ABOVE STEPS TO HAPPEN THE UPDATE WILL FAIL. IF IT FAILS START OVER AGAIN.

The transfer will auto complete and the Bury update manager will reach 7. **END OF UPDATE.**

AT THE END OF THE UPDATE YOUR SCREEN MAY GO BLANK WITH A PROGRESS BAR MOVING ACROSS IT. This indicated the screen software is also being updated and may take 10 minutes.

BLUETOOTH USB DONGLES.

Bluetooth Dongles are readily available from most computer or electronic stores. They plug into the USB port of your computer and provide Bluetooth functionality if your computer was not previously Bluetooth enabled.

Bluetooth Dongles with Bluetooth Version 2.0 and EDR work the best.

Suitable Dongles can be found at:
